High density storage solutions featuring ThinLine technology

Storage Solutions for every space.

Spacefile's Success Story

spacefile 📂

Our History

Evolving from our Supreme System heritage, Spacefile International Corp is a leading North American manufacturer of High Density Storage and Filing Solutions. For over 40 years, Spacefile International Corp's ThinLine products have offered storage solutions to a wide range of markets including commercial, health care, government, education, institutional, and many other applications.

Spacefile developed the original Roll-Away II and Roll-Away III (now known as Bi-Files and Tri-Files) and continues to develop some of the most innovative storage solutions in the world.

Our Large Mechanical Assist Mobile (SDS) and our Mini Storage Aisle (MSA) have also found great success in the market. In recent years, we have expanded our product offerings to include many custom design solutions.

Spacefile continues to grow exponentially and increase its importance and presence in the international marketplace.

Our Mission

To achieve the material and information storage needs of our customers in the least amount of space possible.

Spacetools – The Leading Edge of Design

Spacefile has its own custom extension of Configura CET Designer[®] loaded with Spacefile products. Spacetools by Spacefile offers space planning, product configuration and specification with stunning 3D presentations.

Spacefile Spacetools integrates high density storage solutions within a total design strategy. The dynamic and user-friendly extension allows users to change design features such as tier sizes and colors with the click of a mouse. Discover the attractiveness and accuracy of the Spacefile Solution in 3D.

High Density Solutions

Mechanical Assist Mobile (SDS)

The best solution for high density storage and filing needs is Spacefile's SDS Mechanical Assist Mobile. This system comes available with single and double depth carriages up to 32 feet long and mechanical assist capability for easy carriage movement. Aisle locks prevent unwanted carriage movement and all ThinLine tier options are available.

Mini Storage Aisle (MSA)

The Mini Storage Aisle (MSA) allows you to push a narrow space to maximum capacity. Sliding single and double mobile units provide maximum storage with minimum space requirements. The MSA is a mobile (front-to-back) system available with fixed, single and double width carriages. Designed with anti-tip and anti-drift features, these sleek systems are safely designed for high traffic and heavy usage.

Bi-File & Tri-File

Bi-File and Tri-File Systems, previously known as Roll-Away II and Roll-Away III, are available with any of Spacefile's ThinLine shelving and remove the need for an entrance or aisle access. The mobile system is on a mechanical track that allows you to laterally slide the front

Storage Solution

for every space.

cabinet(s) aside to access the second or third row. Bi-File systems have two rows and Tri-Files have three rows of deep shelving, allowing you to double or triple your storage capacity.

Spacefile is the best choice for your high density storage and filing needs

Here are the Top 8 reasons you need Spacefile

Turn Key Solution:

Spacefile and its strong dealer network provide a complete, finished solution including initial consultation, space planning, proposal generation, file conversion, manufacturing, delivery and installation. No other parties are required, as Spacefile and its dealers provide support long after our delivery to you.

Height:

Due to our ThinLine design, Spacefile can typically fit 7 storage shelves in the same height our competitors require for only 6 shelves.

3

Self-Leveling **Fully Finished Floating Floors:**

Spacefile is the only manufacturer to offer a self-leveling fully finished floating floor on all of its systems. Because they are not attached to the floor, Spacefile's systems can be easily moved, expanded and re-leveled without any floor construction or alteration. This is ideal for leased buildings, hospitals and heated/vented floors.

Versatility & Efficiency:

Spacefile's custom applications are individually adapted to any dimension. All Spacefile products are modular and can be added to, moved, rearranged or reconfigured to meet changing requirements. Tiers are available in 24", 30", 36", 42" and 48" width increments as standards, with various opening heights and depths for ease of use and improved efficiency.

5

Security & Durability:

Solid steel construction and interlocking one-piece welded assembly allow for security without the use of doors (PIPEDA & HIPAA compliant). Individual locked doors such as Tambour Doors can be added and we offer a variety of custom security and locking options. Spacefile is proud of the exceptional strength of its products and stands behind every system.

Environmental Consideration:

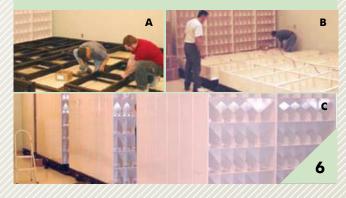

Spacefile has demonstrated a thorough understanding of the green building practices and principles of LEED[®]. We use powder paint coatings that have negligible VOC content, steel has 42% recycled content, shipping materials are recycled and we gladly reuse our packaging.

Ease of Installation:

Part of our turnkey solution is providing easy and worry-free installation. Our team of trained installers leads every project and our systems are easily and quickly installed on top of any surface. Shipping, delivery and installation will be seamless and timely for any size project.

Accessibility:

Spacefile's products can be accessed safely and efficiently by people with wheelchairs. The high density storage systems are designed to be accessible to all employees and engineered to minimize space.

What do you want to be when you grow up?

Modularity - No matter how small or large your storage requirements, Spacefile will find the solution that is right for you. Our modular systems can be expanded in length, depth or height and the tiers can be attached to any mobile system, protecting your investment.

Flexibility - Spacefile offers the attractive option of factory laminate panels on all of its high density storage systems. Our wide variety of finishes and laminate colors complement the décor of any professional work environment, and our high density storage systems save floor space.
